

Bhupinder Singh

Software Developer | Systems Tester | Final-Year IT Student

Wellington, New Zealand | +64 225 000 501 | Bhupindersinghrakhra99@gmail.com
bhupindersingh.app | github.com/Bhupinder22500650 | LinkedIn

Professional Summary

Final-year Bachelor of Information Technology student at WelTec with hands-on experience in software development, systems testing, IT support, and user-focused application development. Currently gaining commercial software testing experience as a Junior Systems Tester with Student Job Search (SJS), testing real digital products and identifying, documenting, and re-testing software issues.

Experienced in building web and mobile applications using React, Next.js, React Native, JavaScript, TypeScript, PHP, Python, FastAPI, MySQL, and REST APIs. Comfortable with manual functional testing, regression testing, cross-browser and cross-device testing, defect reporting, Git/GitHub, Jira, Agile/Scrum, and technical documentation. Strong interest in graduate and junior opportunities across software development, frontend/full-stack development, QA, and software testing.

Technical Skills

Programming: JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3, C# (academic)

Frontend & Mobile: React.js, Next.js, React Native, Vite, Tailwind CSS, Expo, Responsive Design

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, CRUD, API Integration

Databases & Authentication: MySQL, SQL Server, Supabase, AsyncStorage, JWT concepts

Testing & QA: Manual Functional Testing, Regression Testing, Exploratory Testing, UAT, Cross-Browser Testing, Cross-Device Testing, Test Cases, Defect Reporting, Re-testing, Usability Testing

Development Tools: Git, GitHub, Postman, VS Code, Jira, Figma, Docker fundamentals, MS Project

Cloud & Deployment: Vercel, Cloudflare, AWS Fundamentals, Supabase

Other: Agile/Scrum, UI/UX, WCAG Accessibility Basics, Power BI, Excel, Technical Documentation

Professional Experience

Junior Systems Tester

Student Job Search (SJS)

June 2026 – Present

Wellington, New Zealand

- Perform hands-on testing of SJS digital products, including mobile and web application functionality across realistic user journeys.
- Test workflows such as account access, profiles, job management, applications, status updates, declarations, document viewing, and other end-user functionality.
- Identify software defects and usability problems and communicate findings clearly so they can be investigated and resolved by the development team.
- Re-test functionality after changes to confirm fixes and identify regression issues before software releases.
- Participate in testing workshops and work with product, development, and testing stakeholders to provide feedback on application behaviour and user experience.
- Apply structured manual testing methods while considering expected behaviour, actual results, edge cases, usability, and consistency.

IT Volunteer Support Technician

Wellington E2E Centre

April 2026 – Present

Lower Hutt, Wellington

- Provide day-to-day IT support for staff and educators across Windows and macOS environments.
- Diagnose hardware, software, printer, peripheral, account, and basic network issues using systematic troubleshooting methods.

- Perform operational system checks, document problems clearly, and verify that issues are properly resolved after fixes are applied.
- Explain technical problems and solutions in simple language to non-technical users.
- Manage multiple support tasks independently while minimising disruption to normal centre operations.

Produce Assistant
PAK'nSAVE

January 2024 – Present
Wellington, New Zealand

- Work effectively in a high-volume retail environment while consistently meeting daily operational and quality targets.
- Maintain product quality, stock availability, presentation, and store standards during busy shifts.
- Identify stock and workflow issues early and communicate them clearly to team leaders.
- Demonstrate reliability, customer service, time management, teamwork, and attention to detail under pressure.

Selected Technical Projects

AI-Powered Phishing Domain Detector – Capstone Project *React / FastAPI / MySQL / Supabase / Python*

- Working as part of the Threat Hunters capstone team to develop a system for analysing domains and identifying potential phishing threats.
- Responsible primarily for frontend development, UI/UX planning, manual testing, technical documentation, and frontend/API integration.
- Developing the frontend using React and Vite with a planned workflow of wireframes, prototypes, stakeholder approval, and implementation of the final interface.
- Integrating the frontend with a Python FastAPI backend, MySQL database, Supabase authentication, and machine-learning classification components.
- Supporting domain analysis workflows including manual domain entry, CSV-based input, phishing feed collection, feature extraction, and classification results.

Personal Portfolio Website

Next.js / TypeScript / Tailwind CSS / Vercel

- Designed, developed, and deployed a professional personal portfolio website to showcase development projects, technical skills, and professional experience.
- Built responsive, reusable UI components and optimised the website for desktop and mobile devices.
- Managed deployment, domain configuration, source control, and iterative performance improvements.
- Live website: bhupindersingh.app

Coffee Bliss – Cross-Platform Mobile Ordering App

React Native / Expo / JavaScript / AsyncStorage

- Built a mobile application with user onboarding, menu browsing, cart management, checkout, and order history functionality.
- Implemented local data persistence with AsyncStorage and structured reusable React Native components.
- Tested complete user journeys across iOS and Android, identifying usability and functional issues before finalising application flows.

Car Online Sale System (COSS)

PHP / MySQL / JavaScript / HTML5 / CSS3

- Developed a full-stack web application supporting user accounts, vehicle listings, search and filtering, and contact functionality.
- Implemented CRUD operations and MySQL-backed application functionality using a structured web-development architecture.
- Conducted cross-browser and responsive testing across desktop and mobile layouts.
- Applied maintainable CSS using BEM methodology and incorporated accessibility considerations into forms and page structure.
- Source code: github.com/Bhupinder22500650

Education

Bachelor of Information Technology
Wellington Institute of Technology (WelTec)

Feb 2024 – Nov 2026 (Expected)
Wellington, New Zealand

Focus Areas: Software Development, Web Development, Mobile Development, Software Testing, UI/UX, Data Analytics, and Information Technology

Relevant Study: Testing & Secure Coding, Capstone Project, Web Application Development, Mobile Application Development, Data Mining, Human Computer Interaction, Agile Project Management, Cybersecurity & Incident Response

Certifications & Professional Learning

- Become a Full-Stack Web Developer – LinkedIn Learning
- Cisco Certified Network Associate (CCNA)
- Introduction to Hardware and Operating Systems – IBM
- IT Help Desk for Beginners – LinkedIn Learning
- Datacom Automation AI Accelerator Job Simulation
- Deloitte Australia Data Analytics Job Simulation
- Skyscanner Front-End Software Engineering Job Simulation

Additional Information

Work Rights: New Zealand student visa – authorised to work up to 25 hours per week during study and full-time during scheduled academic breaks. Bachelor's degree expected to be completed in November 2026.

Location: Wellington region, New Zealand

Career Interests: Graduate Software Developer, Frontend Developer, Full-Stack Developer, Junior Software Engineer, Systems Tester, Software Tester, and QA roles.
